The alphabetical arrangement in metres,—the uniform position of parts, placing the treble and alto on one staff, while the tenor and base are kept apart,—the clearness of type, both in otes and words,—together with the con-ciseness and sufficiency of the elementary exercises, combine to furnish in one work, stractions which are not to be found in

any other. It is a collection by five hundred edi-tors, of the most admired tunes and anthems which for years have been the basis of our American church music. The plan of this work is unique. No such pain of this work is unique. No such collection has before been undertaken, and into this work have been gathered all the tunes, from every source, that have been widely popular in this country. The music is not new, but it is clearly manifested that none but thoroughly tested tunes have been admitted, which have been proced and have become established favor-ites. It would be difficult to find a fami-liar tune which has not ben included.
